Hazard, C., R. Hanbury Brown and, The radio emission from normal galaxies, I. Observations of M31 and M33 at 158 Mc/s and 237 Mc/s. 297
—— *and D. Walsh,* An experimental investigation of the effects of confusion in a survey of localized radio sources 648
Hindmarsh, W. R., Collision broadening and shift in the resonance line of calcium 11
—— *and K. A. Thomas,* Collision shifts in the argon spectrum 21
Holborn, F. M., Report of his observatory 420
Hoyle, F., The ages of Type I and Type II subgiants 124
—— *C. B. Haselgrove and,* Main sequence stars 112
Hyderabad, Nizamiah Observatory, Report of proceedings of 394
Instruments: The observation of solar granulation from a manned balloon. I. Observational data and measurement of contrast, *D. E. Blackwell, D. W. Dewhirst and A. Dollfuss* ... 98
—— An experimental investigation of the effects of confusion in a survey of localized radio sources, *C. Hazard and D. Walsh* 648
—— The Fabry-Perot monochromator, *J. E. Geake, J. Ring and N. J. Woolf* 616
Investments 338
Jeffreys, Harold, Nutation: comparison of theory and observations 75
Jennison, R. C. and V. Latham, The brightness distribution within the radio sources Cygnus A (19N4A) and Cassiopeia (23N5A) 174
Jodrell Bank Experimental Station, Report of proceedings of 373
Johannesburgh Union Observatory, Report of proceedings of 389
Junior Members elected 1, 457, 458, 459, 585, 586, 592
Kinman, T. D., A note on the RR Lyrae variables... 134
—— Globular clusters, I. The radial velocities of southern globular clusters 157
—— Globular clusters, II. The spectral types of individual stars and of the integrated light ... 538
—— Globular clusters, III. An analysis of the cluster radial velocities 559
Kodaikanal Observatory, Report of proceedings of 396
Latham, V., R. C. Jennison and, The brightness distribution within the radio sources Cygnus A (19N4A) and Cassiopeia A (23N5A) 174
Laurie, P. S., Sunspots (Report on Progress of Astronomy) 435
London, University of, Observatory, Report of proceeding of 371
Malvern, Royal Radar Establishment, Report of proceedings of 372
Mathematical principles: On the interpretation of solar granulation, *Peter Fellgett* 475
—— On the H-functions for isotropic scattering, *D. W. N. Stibbs and R. E. Weir* 512
—— Some formulae connecting Harvard x and y equatorial coordinates and standard co-ordinates for the Magellanic Clouds, *A. J. Wesselink* 576
Meek, B. L., On the shape of cometary tails 3
Meetings of the Royal Astronomical Society: Reports of proceedings at:
1959 January 9 1
1959 February 13 (Anniversary Meeting) 325
1959 February 13 (Annual General Meeting) 326
1959 March 13 457
1959 April 10 457
1959 May 8 458
1959 October 9 585
1959 November 13 586
1959 December 11 587
Menzies, A., David S. Evans, R. H. Stoy and, Fundamental data for southern stars (Second List) 638
Mestel, L., The magnetic and dynamical fields outside a proto-star 223
—— A note on the magnetic braking of a rotating star 249
